## **AOS Ware Launches Google Checkout on the OPCommander eCommerce Platform**

Jersey City, NJ (1.2.09) – AOS Ware is happy to announce that Google Checkout is now available on the latest version of the [OP Commander eCommerce system](#).

“Google Checkout is a secure way to purchase items online and it makes online shopping even easier”, says Dave Stewart, Sr. Product Developer at AOS Ware. With Google Checkout, you simply register once, allocating a primary payment source and you can shop anywhere that has the Google Checkout logo. This helps the user avoid setting up multiple accounts and sharing their credit cards directly with online retailers.

For AOS Ware online retailers, Google Checkout brings many benefits including:

- Low processing fees
- Excellent fraud detection & prevention
- Easy checkout for customers who have a current Google Checkout Account
- Simple sign-up process for new Google Checkout customers

If you currently advertise your website with Google AdWords, the benefits go even further:

- Free transaction processing when you use Google AdWords
- Google Checkout users click on ads 10% more when the ad displays the Checkout badge and convert 40% more shoppers

If you are interested in advertising with Google, AOS ware offers these services through our partner, [Fortune Web Marketing](#).

“The ease of use and benefits Google Checkout brings not only to online retailers, but to the end-user, are clearly relevant to how people shop online today or manage their online stores. Adding this option was a step in the right direction for our clients and we are excited to offer it to them” states Mr. Stewart.

Current customers, who are running the latest OP Commander platform, can easily add this feature to their website. To learn more please send an e-mail to [features@aosware.com](mailto:features@aosware.com).
